RE: Change in Identification for existing FCC ID: SWX-SR4 to
RAR20008001 as per Title 47 chapter I part 2.933 (b).

To Whom It May Concern,

The module FCC ID: SWX-SR4 a radio module tested under part 90
subpart Y Public Safety 4.940 to 4.990 GHz band, received an FCC Grant
on July 11, 2006.

BelAir Networks is submitting for approval the subject mini-PCI form
factor module for a change in identification as per part 2.933 for
marketing advantages.

A letter of agent authorization from the original manufacturer (Ubiquiti
Networks) is included as part of this submission.

The module bearing the modified identification is exactly the same as the
original and will be installed in a BelAir Networks product.

BelAir Networks will use the module **as is**, with no modifications, and used
as per the subject Grant.

An FCC ID will be placed on the module, located as described in the label
information document, included as part of this submission.

Thus, the original test results continue to be representative of and are
applicable to the equipment bearing the changed identification.

Photographs showing the exterior appearances of the subject module are
included as part of the submission.

Sincerely

Marcel Chenier
Vice President of Engineering
BelAir Networks Inc.
