RE: Class II Permissive Change
FCC ID: RAR20008001
Public Safety band Radio Module 2 (PSM2)

To Whom It May Concern,

The module FCC ID: RAR20008001 is re-submitted under a Class II permissive change.

The subject module will be co-located with other BelAir Networks radio modules in BelAir Networks products.
The Class II submission requires changes in the MPE analysis and the RF exposure safety requirements.
The RAR20008001 module has not been modified and thus the original test results continue to be representative of and are applicable to the equipment as per the original filing.

The exhibits provided include a new MPE analysis outlining co-location RF exposure calculations, and a PSM2 Product manual covering the RAR20008001 module installed in BelAir Networks product. Previously submitted exhibits are applicable.

Sincerely,

Marcel Chenier,
VP Engineering,
BelAir Networks Inc.
