

2013/4/2

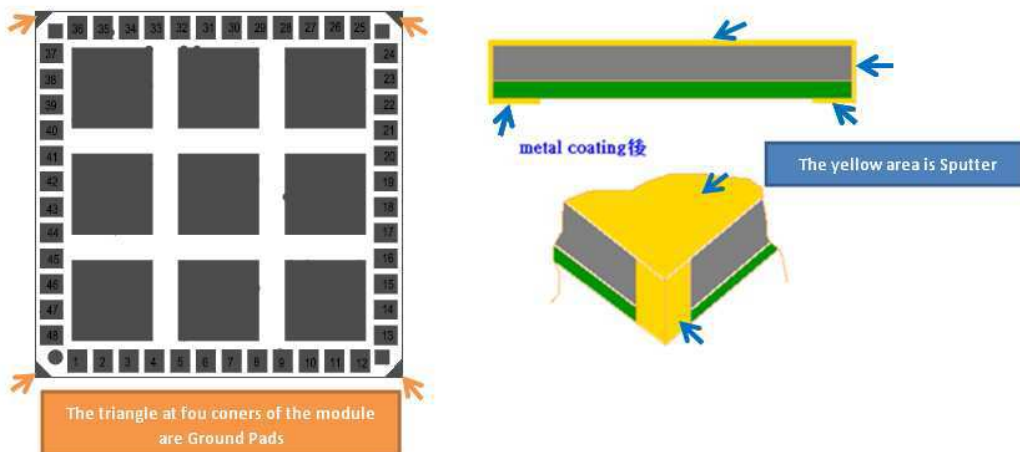

FCC ID: RAXWN7911A

Declaration for Shielding

WN7911A-LF is a 1x1 single-band 2.4GHz IEEE 802.11 b/g/n WiFi module with on-board PCB printed antenna. WN7911A-LF attains the data transmission speed up to 150 Mbps and provide SDIO physical interface to the board for WiFi.

The shielding is achieved by the following method,

Shielding Method:

1. Sputter material: Stainless/Copper/Stainless

2. Shielding path: Shielding path is show in yellow sputter above, it pass through the four coners from Top side to the triangles Ground.Pad at Bottom side to become Shielding Cover.

Sincerely yours,

Simon Liu / Manager, RD center
