Subj: AUTOMATIC IDENTIFICATION SYSTEMS CLASS B CS; MODIFICATION

We have reviewed the materials submitted by Ms. Jing Song of SGS-CSTC Standards Technical Services on your behalf requesting review of the modification to the B&G V60-B and SIMRAD RS40-B. These units continue to meet the requirements of the applicable AIS Class B CS international standards. The revised Certificates of Approval (COA) are enclosed.

Each COA will remain valid for five years from the date of issuance, unless we suspend, withdraw, or terminate it. Terms of approval are on the reverse of the certificates. Any changes or alternation of components, construction or manufacturing location of the products may require the products to undergo additional testing, or requalification in order to keep their approval.

This letter and all attachments were delivered electronically to Filippo.Campolmi@navico.com. No hard copies will be provided. You are welcome to print as many copies as you wish. If you have any follow-up to this approval, please contact Raymond Martin at raymond.w.martin@uscg.mil or typeapproval@uscg.mil. Please reference ID#: 2022-2783 in any correspondence related to this project.

Sincerely,

F. A. STROM.
Commander, U.S. Coast Guard
Chief, Systems Engineering Division
Office of Design and Engineering Standards
