

## Response to TCB Findings

1. Please supply a copy of the user's manual.

Supplied

2. The word "ID" is missing in the label after "FCC" to read "FCC ID".

Please supply a corrected label sample.

Supplied. Please disregard the label picture supplied under external photos, that label is to represent the placement on the unit, but not the final label.

3. Has the device complied with the requirements of 15.31(e)?

Yes. The EUT was exercised with a power supply variation between 93.5 VAC (85% Nominal), and 126.5 VAC (115% Nominal), and found to vary less than 1 dB in output power. (Logbook 0024, page 18). The EUT has an onboard 5 VDC linear regulator.
