Assembling

Unpack

Check your product box for the following items.

- Tablet
- User manual
- Adapter

You can purchase additional accessories from your local retailer.

Charge the battery

Before using the device for the first time, you must charge the battery.

1. You can charge the device with a travel adapter or by connecting the device to a PC with a USB cable.
2. Battery full icon is shown when finished if your device is off.

Warning: Use only original batteries and chargers. Unapproved chargers or cables can cause batteries to explode or damage your device.

Install the memory card

To store additional multimedia files, you need to insert a memory card.

1. Insert a memory card with the gold contacts facing downwards.
2. Push the memory card into the slot until it clicks.

Notice: Our company uses approved industry standards for memory cards, but some brands may not be fully compatible with your device.

Getting started

Turn your device on and off

To turn on your device, press and hold the power key.

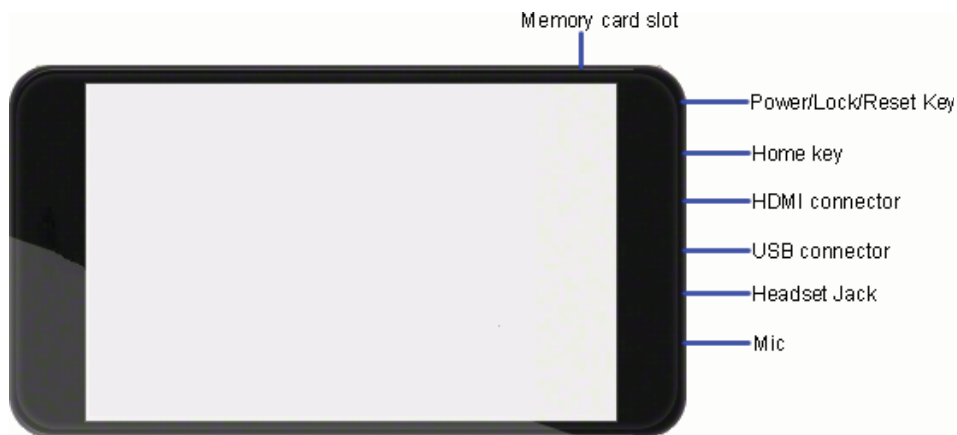

To turn off your device, press and hold the power key, and then tap **Power off** → **OK**.

Switch to flight mode

To use only your device's non-network services, switch to flight mode. Please follow the instructions below to turn on flight mode:

Tap **Settings** → **WIRELESS & NETWORKS** → **More** → **Airplane mode** from application list to create a checkmark.

Device layout

Volume keys	Adjust the device volume.
Power/Lock/Reset	Press and hold for 2 seconds to turn on or turn off the device. Press to lock the device. Press and hold for 6 seconds to reset the device.

Home screen

The home screen has multiple panels. Scroll left or right to the panels on the home screen, you can view indicator icons, widgets, shortcuts to applications, and other items.

1	Indicator icons
2	Open the search bar
3	Scroll left or right to the other panels
4	Access the application list and widget screen
5	Task bar

Add items to the home screen

Tap the icon at the upper right to access the application list shown below from home screen.

Scroll left or right to view more items.

To add items to the home screen, tap and hold an item, then drag the item to a new location.

To remove items from the home screen, tap and hold an item, then drag the item to the **Remove** area at the top of the home screen.

Task bar

The task bar is shown at the bottom of the screen. It displays commonly used option buttons, battery level indicator, current time and other indicator icons.

1	Adjust the device volume to lower.
2	View the applications you have accessed recently.
3	Return to home screen.
4	Return to previous screen.
5	Adjust the device volume to higher.

Indicator icons

Icon	Definition	Icon	Definition
	Open Wi-Fi available		Flight mode activated
	Wi-Fi connected		Music being played
	Uploading data		Downloading data
	Connected to PC		Battery power level

Notification panel

To show a pull-down list of the recent notifications, drag the left area of the notification bar downward.

To show a pull-down list of the shortcut settings, drag the right area of the status bar downward.

You can reset system and desktop settings to their original values by the following steps:

1. Select **Settings** → **Backup & reset** from application list.
2. Tap **Factory data reset**.
3. If you want to erase all data on your tablet, such as music, pictures and any other data, tap **Erase SD card** checkbox to create a checkmark.
4. Tap **Reset tablet**.

The device resets to the factory default settings automatically.

Warning!: Factory data reset will erase all data from your device and SD card, including your google account, system and application data and settings and any other downloaded applications.

Web

Email

To receive and send mail, you must have a remote mailbox service. This service may be offered by a service provider. Your device is compliant with applicable internet standards for POP3/IMAP/Exchange.

Before you can send or receive mail on your device, you need to set up an email account and define the email settings correctly. You can define more than 1 mailbox.

◆ Set up your email

1. Tap **Email** from application list.
2. You can use mailbox guide to set up your mailbox, tap **Next** until it's done.
3. If you need to add another email account, tap the option button at the upper right → **Settings** → **ADD ACCOUNT**, then set up the email account with the mailbox guide.

When you are finished setting up the email account, the email messages will be downloaded to your device. If you have created more than two accounts, you can switch between email accounts. Select an account name at the top left of the screen and select the one you want to retrieve messages from.

◆ Delete your email account

1. Open the application list and select **Email**.
2. Tap the option button at the upper right, then select **Settings** and the email account you want to delete.
3. Tap **Remove account**.
4. Tap **OK** to confirm.

◆ Create and send email

1. Open **Email** application.
2. Tap .
3. In **To** field, enter the recipient's email addresses manually and separate them with a comma. Add more recipients by tapping **Cc/Bcc**.
4. To insert attachments, tap the option button at the upper right and select **Attach file**.
5. Enter the subject and the text.

6. Tap **SEND** to send the email.

Gmail

You can retrieve new email messages from the Google Mail webmail service to your inbox. Before you can send or receive mail on your device, you need to set up a Gmail account.

◆ Create a Gmail account

If you don't have a Google Account, tap **New**, then follow the on-screen instructions to create a new one.

◆ Set up a Gmail account

If you want to add an existing account, tap **Existing**, enter your email address and password, and then select **Next**, when you are finished setting up the email account, the email messages are downloaded to your device.

◆ View email messages

1. When you open the email account, the amount of unread email messages is displayed at the title bar and the unread email messages are displayed in bold.
2. To view an email message, tap it.
3. To mark an important email message, tap the star icon below the date. To cancel the mark, tap the star icon again.

◆ Create and send an email

1. Tap .
2. In **To** field, enter the recipient's email addresses manually and separate them with a comma. Add more recipients by tapping **Cc/Bcc**.
3. To insert attachments, tap the option button at the upper right and select **Attach file**.
4. Enter the subject and the text.
5. Tap **SEND** to send the email.

Browser

Tap **Browser** from application list to access to the web.

◆ Browser webpages

1. Select **Browser** to launch a specified homepage.
2. To access a specific webpage, select the URL input field, enter the web address of

the webpage, and select **Go**.

3. To zoom in, place two fingers on the screen and spread them apart. To zoom out, move your fingers closer together. You can also double-tap the screen.

◆ **Add windows**

You can have multiple windows open at one time.

1. To add a new window, tap  at the title bar.
2. To open up a window, tap the title of the window.
3. To close the window, tap  at the title bar.

◆ **Set homepage**

1. Tap the option button at the upper right.
2. Select **Settings** → **General** → **Set homepage**.
3. Enter the web address of the desired webpage.

◆ **Add bookmarks**

While navigating a website, tap  to add current URL to your bookmark list and easily access it later.

◆ **View bookmarks and history**

Tap  to open the bookmark list and the recent history. Tap a bookmark or any entry to display the webpage.

◆ **Customize browser**

To make adjustments in your browser settings, tap the option button at the upper right, and then select **Settings**.

Play Store

Play Store allows you to easily download an abundance of applications directly to your device. Before using the Play Store, you must have a Google Account.

1. From the application list, tap **Play Store**.
2. Sign in to your Google Account.
3. Search for and download applications as desired.
4. Follow the on-screen instructions.

Note

- All applications offered by Play Store are developed by third party. To get the

information about the developers, you can read the descriptions of each application.

- Our company is not liable for performance issues caused by third-party applications.

Entertainment

4K Player

Select **4K Player** from application list.

You can view or play 4k video files with this application, which supports animation preview and presentation display.

◆ Supported file formats

Calculator

With this feature, you can use the device as a calculator. The calculator provides the basic arithmetic functions. Tap the virtual numeric and calculation keys to perform a calculation.

Connectivity

USB Connection

You can connect your device to a PC and use it as a removable disk, which allows you access the file directory.

1. If you want to transfer files from or to a memory card, insert a memory card into the device.
2. With a USB cable, connect your device to a PC.
3. Open the notification panel, select **USB connected**.
4. Tap **Turn on USB storage**.
5. Open the folder to view files.
6. Copy files from the PC to the memory card.

Wi-Fi

With Wi-Fi, you can connect to the internet or other network devices anywhere an access point or wireless hotspot is available.

◆ Activate the Wi-Fi feature

1. From application list, tap **Settings**.
2. In the field of WIRELESS & NETWORKS, turn on the **Wi-Fi** feature.

◆ Find and connect to Wi-Fi

1. Once the Wi-Fi feature is activated, the device automatically search for available Wi-Fi connection.
2. Select a network.
3. Enter a password for the network (if necessary).
4. Select **Connect**.

Bluetooth

You can connect to other compatible devices with wireless Bluetooth technology. Both devices only need to be within 33 feet of away each other.

With Bluetooth technology you can do the followings: handle calls with wireless Bluetooth headset, listen to music a wireless stereo headset, send or receive data.

◆ **Activate Bluetooth**

1. From application list, tap **Settings**.
2. In the field of WIRELESS & NETWORKS, turn on the Bluetooth feature.

◆ **Find and pair with other Bluetooth-enabled devices**

1. Select **Settings**→**WIRELESS & NETWORKS**→**Bluetooth**→**Search for devices**.
2. Select a device.
3. Enter a PIN and select **OK**. When the owner of the other device enters the same PIN or accepts the connection, pairing is complete. If the pairing is successful, the device will automatically search for available services.

Note: Some devices, especially headsets may have a fixed Bluetooth PIN, such as 0000. If the other device has a PIN, you must enter it.

◆ **Send data via Bluetooth**

1. Select a file, such as a contact or a media file.
2. Select an option of sending data via Bluetooth.
3. Search for and pair with a Bluetooth-enabled device.

◆ **Receive data via Bluetooth**

1. Select **Settings**→**WIRELESS & NETWORKS**→**Bluetooth**, tap **BlueZ** to set your device is visible to other Bluetooth devices.
2. When prompted, enter the PIN for the Bluetooth wireless feature and select **OK**.
3. Tap  at the task bar and then select **Accept** to confirm and receive data from the device.

VPN

You can create virtual private networks and connect to your private network securely through a public network, such as the internet.

Note: You need to set a lock screen PIN or password before you can use VPN.

◆ **Set up VPN connections**

1. Open the application list and select **Settings**→**More**→**VPN**.
2. Select **Add VPN profile** and customize the connection information. (Available options may vary depending on the VPN type.)
3. Tap **Save** when you are finished.

◆ **Connect to a private network**

1. Select **Settings**→**More**→**VPN**.
2. Select a private network to connect.

3. Enter the user name and password and select **Connect**.

Wireless display

On the application screen, tap **Settings**→**Display**→**Wireless display**.

Use this feature to connect your tablet to a large screen with a miracast dongle and then share your contents.

Note:

-Some files may be buffered during playback depending on the network.

-To save energy, deactivate this feature when not in use.

-To play videos or game on a TV, select an appropriate TV mode to get the best experience.

Follow the procedures below to activate this feature.

1. Connect your tablet to a large screen with a miracast dongle.
2. Select an appropriate TV mode.
3. Activate the Wi-Fi feature
4. On the application screen, tap **Settings**→**Display**→**Wireless display**, activate wireless display feature, then start searching by tapping **SEARCH FOR DISPLAYS**.
5. Select a device showed on the screen, then tap **Connect**.
6. When finished, open or play a file and then control the display with the keys on your device.

Safety Precautions

Read these simple guidelines before using your device. Not following them may be dangerous or illegal.

◆ Aircraft

Switch off in aircraft and follow any restrictions. Wireless devices can cause interference in aircraft.

◆ Vehicles

Never use your device while driving. Place it in a safe place.

Position your device within easy reach. Be able to access your device without removing your eyes from the road.

◆ Electronic devices

In some circumstances your device may cause interference with other devices.

◆ Potentially explosive environments

Switch off your device when in any area with a potentially explosive atmosphere, and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

◆ Pacemakers and other medical devices

Pacemaker manufacturers recommend that a minimum separation of 8 inches be maintained between a wireless device and a pacemaker to avoid potential interference with the pacemaker.

Operation of any radio transmitting equipment, including wireless connect may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions.

Switch off your device in health care facilities when any regulations posted in these areas instruct you to do so.

◆ Operating environment

When connecting to other device, read its user guide for detailed safety instructions.

Do not connect incompatible products.

Do not place your device in the air bag deployment area.

Use the device only in its normal operating positions as explained in the product documentation.

Always switch off your device when its use is prohibited or when it may cause interference and danger.

◆ Areas with posted regulations

Switch off your device when any regulations posted in these areas instruct you to do so.

Care & Maintenance

- ◆ Use only manufacturer-approved accessories. Use general accessories may shorten the life of your device or cause device to malfunction.
- ◆ Keep your device dry. Humidity and all types of liquids may damage device parts or electronic circuits.
- ◆ Do not use or store the device in dusty, dirty areas.
- ◆ Do not store the device in hot or cold areas.
- ◆ Do not store your device near magnetic fields.
- ◆ Do not store your device with such metal objects as coins, keys and necklaces.
- ◆ Do not drop your device or cause any impacts to your device.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
