iTherm™ 280 and POSjet® Wireless Receipt Printers

- Designed specifically for the POS environment.
- Offers high level of security for system integrity.
- Connects to any 802.11b wireless Ethernet LAN network.
- Integrated, self-contained base design conserves space.
- Protected solution, reduces risk of failure.
- High-performance remote printing at distances up to 300 feet.
- Shares power with printer, no external power supply needed for the wireless component.

Full Specifications in Adobe® Acrobat® PDF format.

Operational efficiency. Improved customer service. Layout flexibility. We implemented an 802.11b wireless option for our popular Ithaca® POSjet® inkjet receipt printers and our new Ithaca® iTherm™ 280 thermal receipt printer. Eliminating the need for a connected point-of-sale (POS) terminal, this new wireless feature offers convenient remote printing with no communication wires and no worries. The lower labor and installation cost of this wireless option opens up new possibilities for additional terminals or store reconfigurations.
