To Whom It May Concern:

Subject: Sensor 4 - Statement of Conformity for the Client in Non-Associated mode

The Fluke Networks (AirMagnet) Sensor 4 SmartEdge sensor monitors the 802.11a/b/g/n traffic in the wireless environment and analyzes network packets for network statistics as well as security infringements.

The Sensor 4 SmartEdge Sensor is a client device. The client software and associated drivers will not initiate any transmission on DFS frequencies without initiation by a master. This includes restriction on transmissions for beacons and support for ad-hoc peer-to-peer modes.
