To Whom It May Concern:

Sensor 4 - Statement of Conformity – Operational modes cannot be modified by end user.

The Fluke Networks (AirMagnet) Sensor 4 SmartEdge sensor monitors the 802.11a/b/g/n traffic in the wireless environment and analyzes network packets for network statistics as well as security infringements.

The Sensor 4 SmartEdge Sensor is a client device. The client software and associated drivers that control the channels and power levels for the FCC frequencies are set in the firmware and cannot be modified by the end user or the installer.
