Bill,

I am sorry for hindering you on the Christmas day.

I had checked the test data again. And ensure that the field strength level of test report is the actual emission level of worst case of product.

By the way , when can I receive the grant of RRDT10571-DRIVER.

Merry Christmas!

Kelly/NS

主题: FW: Response to Inquiry to FCC (Tracking Number 734370)

Gentlemen,

The FCC has reviewed the report. They are questioning if the signals are properly searched for worst case. Please review your data, and recheck your field strength emissions results. FCC does not believe that the field strength values presented to be sufficient to work with a typical automotive FM receiver

Best Regards,

Bill

Subject: Response to Inquiry to FCC (Tracking Number 734370)

Inquiry:

Gentlemen,

AmericanTCB requests guidance for FCC ID: RRDT10571-DRIVER under the "Permit-But-Ask" procedure. This device is a 15.239 12V IPOD transmitter designed to broadcast an audio signal to a car FM broadcast band receiver. The device can be manually tuned across the entire 88.1 to 107.9 MHz band. There are no external inputs available for connecting to an external analog audio source. The antenna is part of a PCB trace.

Best Regards,

Bill

Response:

The field strength levels are very low. Please request the test lab to verify that the unit tested **actually works** in a typical car.

Do not reply to this message. Please select the [Reply to an Inquiry Response](#) link from the OET Inquiry System to add any additional information pertaining to this inquiry.
