# **RF Exposure Evaluation Statement**

### Product Name: TWS Bluetooth earphones

Model No.: In 1948, In 1945

## FCC ID: RDR-IN1948

# 1.1 RF Exposure Compliance Requirement

### 1.1.1 Standard Requirement

According to KDB447498D01 General RF Exposure Guidance v06

Standalone SAR test exclusion considerations

Unless specifically required by the published RF exposure KDB procedures, standalone 1-g head or

body and 10-g extremity SAR evaluation for general population exposure conditions, by measurement or

numerical simulation, is not required when the corresponding SAR Exclusion Threshold condition, listed

below, is satisfied.

### 1.1.2 Limits

The 1-g and 10-g SAR test exclusion thresholds for 100 MHz to 6 GHz at test separation distances  $\leq$  50 mm are determined by:

[(max. power of channel, including tune-up tolerance, mW)/(min. test separation distance, mm)] ·

- $[\sqrt{f}(GHz)] \le 3.0$  for 1-g SAR and  $\le 7.5$  for 10-g extremity SAR, where
- f(GHz) is the RF channel transmit frequency in GHz
- Power and distance are rounded to the nearest mW and mm before calculation<sup>17</sup>
- □ The result is rounded to one decimal place for comparison

The test exclusions are applicable only when the minimum test separation distance is  $\leq$  50 mm and for transmission frequencies between 100 MHz and 6 GHz. When the minimum test separation distance is < 5 mm, a distance of 5 mm is applied to determine SAR test exclusion

### 1.1.3 EUT RF Exposure

| Operational Mode: EDR (8-DPSK worst case)  Maximum Maximum tune-up Power |   |                              |              |      |                  |                        |
|--|---|------------------------------|--------------|------|------------------|------------------------|
| Channel  | Maximum<br>Peak<br>Conducted<br>Output<br>Power | Tune up<br>tolerance<br>(dB) | (dBm)        | (mW) | Calculated value | Exclusion<br>threshold |
|  | (dBm)   |                              |              |      |                  |                        |
| 2402MHZ  | 4.47  | ±1                           | 5.47         | 3.52 | 1.09             |                        |
| 2441MHz  | 4.37  | ±1                           | 5.37         | 3.44 | 1.08             | 3.0                    |
| 2480MHz  | 3.80  | ±1                           | 4.80         | 3.02 | 0.95             |                        |
| Conclusion: t  | he calculated va                                | lue $\leq$ 3.0, SAR          | is exempted. |      |                  |                        |
