Charging: Red light on.

Charging over: Blue light on.

Appendix

Frequently asked questions

1.Will my headset work with laptops, PCs and PDAs?
Your headset will work with devices that support your headset's Bluetooth   version and profiles.

2.Why do I hear static or interference while on a call?
Appliances such as cordless phones and wireless networking equipment may cause interference, which usually sounds like static. To reduce any interference, keep the headset away from other devices that use or produce radio waves.

3.Will my headset interfere with my car's electronics, radio or computer?
Your headset produces significantly less power than a typical mobile phone. It also only emits signals that are in compliance with the international Bluetooth standard. Therefore, you should not expect any interference with standard consumer-grade electronics equipment.

4.Can other Bluetooth phone users hear my conversation?

When you pair your headset to your Bluetooth phone, you are creating a private link between only these two Bluetooth devices. The wireless Bluetooth technology used in your headset is not easily monitored by third parties because Bluetooth wireless signals are significantly lower in

radio frequency power than those produced by a typical mobile phone.

5.Why do I hear an echo while on a call?

Adjust the headset volume, or move to another area and try again.

6.How do I clean my headset?

Wipe it with a soft dry cloth.

7.The headset does not fully charge.

The headset and the travel charger may not have been connected properly. Separate the headset from the travel charger, reconnect and charge the headset.

8.I cannot use all the features described in the manual.

Available features may vary depending on the connected device. If your headset is connected to two devices at once, some features may be unavailable.

FCC Notice

This device complies with Part 15 of the FCC Rules. Operation is
subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver
   is connected.
-Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
