

ANT-04ABGN-0607-PT

External Patch Antenna

Flexible Wall/Mast Mount Installation, Low Profile, and Directional

The ANT-04ABGN-0607-PT is a dual-band, dual-diversity patch antenna. It features two integrated 2.4 GHz, 6 dBi elements and two 5.1–5.85 GHz, 7 dBi elements arranged in one enclosure. The antenna can be mounted to a wall or mast, indoors or outdoors. Each of the two diversity antenna elements is connected to the access points via RPSMA plug connectors.

The radiation patterns are uniform and symmetrical, providing high levels of signal density into defined coverage zones. The dual-band frequency coverage means that a single type of antenna can be deployed with any radio in the 2.4–2.5 GHz or 5.1–5.85 GHz bands.
