

Response to TCB Findings

1. For NE-W11E requirements of 15.207 and 15.31(e) are applicable if powered by a DC power supply or even to the host if powered by ethernet. Please provide test data demonstrating compliance.

Test data supplied in the revised test report for NE-W11E.

2. The statements on the label do not comply with 15.19(a)(3). Please supply corrected labels for the device. A picture or drawing showing the label placement on the device and description of the label material are also required

Statement corrected and information supplied.

3. Please supply antenna specification sheets

Supplied.

4. Please specify how the antenna connector meets “unique-connector” requirement.

The screw threads are more widely spaced than they are on regular SMA connectors, therefore a regular SMA connector will not fit onto it.
