

Explanation of the operation between XM-WA and XM-5000 series

XM-5000 series is formed by a Probe which is referring to XM-P5000 and Camera unit which is named XM-C5000.

XM-WA is a Wi-Fi wireless communication unit, containing the certified Wi-Fi module as documented in this filing.

Both Probe and Camera unit support XM-WA (wireless communication unit for Wi-Fi):

Probe with XM-WA is subject to handheld operation and SAR test was done as documented in this filing to demonstrate the compliance. And the Camera unit with XM-WA installed is a tabletop or floor standing used which is considered as mobile operation. Details operation please refer to Users_manual_XM Series exhibit.
