**Application for FCC Approval of a mobile device "RX1250T"
FCC ID: RFD-RX-T**

Gentlemen

This final device is a composite device with the modular approved Bluetooth Transceiver (FCC ID: RFD-PANMOD1) and the modular transmitter (FCC ID: HSW-2410G). The equipment fulfills the technical standards and rules of the rule part under which it operates. Additional measurements of the final device enable the co-location of the both modular approved transmitter for the application in a "RX1250T" (FCC ID: RFD-RX-T).

We kindly apply for a grant of our application certification.
This mobile device is intended to be used for remote-control of a total-station and data-logging in surveying applications.

Please contact us if you have any additional questions.

Best regards
