RE: FCC ID: RFK-CBAHP800\_ATCB002958  
Attention: Leon Paul Kass

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the 731 says the device is a part 22 amplifier operating in the frequency range between 824 – 849MHz and 869 – 894MHz. However, the test report shows the frequency range of 806-824MHz and 851-869MHz. The data seems to be for a part 90 frequency range. Please explain and please correct any documentation needed to reflect the actual rule part for which certification is being sought.
2. Please note that the 731 says the FCC ID number is RFK-CBAHP800, but the report says it is RFK-CBAHPNEX. This could be the reason item one is a problem. Please correct all documentation to reflect the same FCC ID number.
3. Please note that the MPE calculations are for FCC ID RFK-CBAHPNEX. Please provide an rf exposure MPE report for FCC ID RFK-CBAHP800.
4. Additional questions may arise based on the response to the above items..

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
