

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

October 9, 2006

RE: Janizary Holdings, Inc.

FCC ID: RFKCHCDMA819

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) There are no Internal Photographs included in this filing. Please provide Internal Photographs.
- 2.) I accept the fact that there are no tune-up controls available within this device after manufacturing is complete. However, I have greater difficulty understanding how there are no controls available during manufacturing to assure that RF power and frequency is maintained. Please tell me how this is done.
- 3.) FYI: If possible, a graph or gain chart of input vs. output RF power would be appreciated for each of the four bands for which Certification is desired. This would greatly aid in my understanding of this device.
- 4.) I note that your Form 731 does not include an emission designator for either of the Part 22 or Part 24 base station frequency bands. Does this indicate that this device can carry/amplify any base station signal found within 869-894 or 1930-1990 MHz?
- 5.) Your Test Report appears to indicate that this device may be capable of analog AMPS. Is this true? If so, then appropriate AMPS test data should also be provided.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
