RE: Janizary Holdings, Inc.

FCC ID: RFKCHCDMA819

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Your form 731 requests the entire Part 22 uplink band of 824-849 MHz and the entire Part 24 uplink band of 1850-1910 MHz band. It is typical for band edge compliance to follow the standard CDMA channelization frequencies of 824.73 – 848.19 MHz for Part 22 and 1851.25-1908.75 MHz for Part 24. The band edge compliance data shown in the Test Report is for a narrower subset of each of these bands. Compliance is shown for only 826-847 MHz, and for 1852-1908 MHz. We recommend that band edge compliance be shown for both 824.73 and 848.19 MHz /1851.25 and 1908.75 MHz at the highest rated power requested on Form 731. Either that or demonstrate how this device will not transmit on the lowest and highest CDMA channels used for each band.
- 2.) Your Canada application form requests 300KGXW. Why are you asking for GSM in Canada? Your application also lists AMPS, but no analog test information is presented. Is this a misprint?
- 3.) Page 93 of the Test Report claims a maximum conducted RF power of 0.5W is this correct?

William H. Graff
President and Director of Engineering
