Leon,

I am about 1/2 through the re-review of this application. So far, I have noted the following:

1) The new manual from comment 9 does not appear to have been provided.
2) You provided a response to comment 10 stating that the AMEA is no longer available, but also provided internal photographs showing the inside of an antenna module. Are these the same device or not? Is is not clear if the AMEA is being certified or not. If not, please update the various operational description files to remove reference to this, as well as internal photograph exhibits should no longer show this. Please review/correct/explain as necessary.
3) The old manual mentions AMEA (comment 10) and will need to be adjusted as well if this is no longer offered.
4)   The access network guide mentioned in the response does not appear to be provided. Please provide.

Please help address these issues so we can continue with the review.

Tim
