Overview

This application is for a class 2 permissive change to permit the use of this previously approved limited modular transmitter to be used in Sonosite, Inc's wireless remote control SonoRemote™ Control, which is used as a peripheral for their diagnostic ultrasound system.

No changes have been made to the radio nor antenna. Radiated spurious emissions data has been submitted in support of this configuration.

Applicant did not request confidentiality.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
