Subject: Limited Modular Approval Compliance for Unshielded Transmitter

To Whom It May Concern,

Nonin Medical, Inc model SABER Bluetooth communications module is constructed without the benefit of an RF shield.

Nonin Medical, Inc acknowledges that despite Limited Modular Approval for this model, the spurious emissions during transmitter operation will be dependent on each host platform in which the module is installed.

Nonin Medical, Inc further acknowledges that each host platform will be required to be tested for transmitter spurious emissions.

Sincerely,

A handwritten signature in cursive script, appearing to read "Harold Rudnick".

Harold Rudnick, NCE
Sr. Quality Engineer
