Status Icon

The status icon of the radio will be shown as

1. Received Signal Strength Indicator (RSSI)
The number of bars on the screen shows the strength of the signal. When all 4 bars are shown, the radio is receiving the strongest signal.
2. Turning off the microphone (Deactivating the microphone)
This icon appears when the microphone is off.
3. Setting the master radio
Since this ACRO-S provides relay function, this icon shows that if the radio is set as the master radio.
4. Battery
The length of the bar shows the remaining level of the battery. When the battery level is low, this icon will start blinking.
5. ID Icon
Displays the user ID.
All radios in the same group will provide different ID number.
6. Group Icon
Displays the group identification number.
All users must form and set a group to communicate with others.
7. Volume
Displays the volume of the earphone.
When the 5 bars are shown, then the volume is max.

- Microphone (Talk Function)
When the power is on, by pressing the (OK) button, it will either activate or deactivate the microphone.
Talk on: Microphone is activated and (#) icon does not appear on the screen.
Talk off: Microphone is activated and (#) icon appears on the screen.
Tip) At the beginning, the Master radio's microphone is on, but the Slave radio's microphone is off.

FCC ID: RGN-ACRO-S

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
