

## PCII REASSESSMENT LETTER

2/21/2015

Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

To whom it may concern:

DigitalPath, Inc, hereby requests a Permissive Change Class II of the radio equipment certification for the gen6\_cpe certification number, FCC ID: RHK-G6CPE. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – No changes to any part component values, replaced some unavailable parts with a different manufacturer of the same or similar tolerance values
- (b) Functional capabilities. – Added a higher gain antenna reflector – previous product only contained a 24dBi antenna, now has a 29dBi antenna and added the 5150-5250MHz UNII band. The 5150-5250MHz band was added via a software change.
- (c) Antenna Characteristics. – N/A
- (d) Cosmetic differences – Plastic enclosure now contains a black dye to produce a grey color

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

A handwritten signature in black ink that reads "Brock Eastman". The signature is written in a cursive, flowing style.

**Brock Eastman, VP Engineering**
