Subject: Modular Approval Statement – licensed radio services transmitter module

Date: November 16th, 2015

FCC Certification Number: R17LE866SV1

TO WHOM IT MAY CONCERN

Pursuant to section III of FCC KDB 996369 D01 Module Equip Auth Guide v01r04, we herewith declare for our module.

Modular approval requirement	Yes	No
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly;	X	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with the applicable FCC rule parts regardless what type of input signal;	X	
(c) The module must contain power supply regulation on the module;	X	
(d) module must demonstrate compliance in a stand-alone configuration; The used test kit is for power supply and data connection only not affecting the modules RF performance.	X	
(e) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display.	X	
(f) The module must comply with all specific FCC rule parts applicable to the transmitter including all the conditions to be provided to the installer in the integration instructions (like e.g. max. antenna gain);	X	
(g) The module must comply with RF exposure requirements including related instructions to be provided to installers and host product users;	X	

Note 1: The module is for use in equipment that is subject to licensing.

Best Regards,

Antonino Sgroi
 EMEA R&D Manager
