

To whom it may concern.

We, **telit Communications S.p.A.**, via Stazione di Prosecco 5/B-34010 Sgonico - Trieste - Italy declare that the device ME910C1-P1 HW 0.0 SW version MOB.900004 is based on the already tested ME910C1-WW HW 0.0, SW version MOB.800004. The 2 devices share the same HW design (based on Qualcomm Chipset MDM9206) and differences between the 2 products are declared as follows:

1) Different memory capacity:

Product	Memory Size
ME910C1-WW	1Gb Nand + 512Mb RAM
ME910C1-P1	1Gb Nand + 1 Gb RAM

2) 2G PA not mounted on ME910C1-P1 and 2G bands disabled by SW

LTE protocol stack is the same for both devices hence results from ME910C1-WW device have been used to demonstrate compliance on ME910C1-P1 for GCF.CC 3.73.0 Requirements PTCRB NAPRD 5.38 and for regulatory approvals purposes (RED, RCM, FCC/IC).

Differences between SW version MOB.90004 and MOB.800004 are 2G disabling and minor changes that do not affect tests executed for ME910C1-WW HW0.0 as the LTE protocol stack and features are the same between these devices and bigger memory capacity is reserved for customer applications.
