Menu functions

All menu options listed.

Phone Book

You can store phone numbers in your phone.

To access this menu, press [**MENU**] in Idle mode and select **phone book** [].

Find

This menu allows you to find an entry using a person's name, entry number, or group name in your Phone Book.

Add Name

This menu allows you to add a new enter to your Phone Book. A name can contain up to 3 numbers in different categories; Home, Office, Cellular.

My Number

In this menu, you can view your phone number.

Memory Status

In this menu, you can view your phonebook memory status.

Speed Dial

Speed dialing allows you to press and hold a key (or keys) to dial the number associated with those key(s).

There are three types of speed dialing; 1-touch, 2-touch, and 3-touch dialing.

Call history

Use this menu to view the calls you have dialed, received, or missed.

To access this menu, press [**MENU**] in Idle mode and select **Call history** [].

All Calls

Use all calls to view received, dialed, and missed calls for your phone. You can also use all calls to erase your call history and view Call Timers. While viewing all calls, you have options such as saving recent call numbers to your phonebook, and editing numbers before saving.

Missed

The phone stores up to 30 of the most recent numbers you have failed to answer. When you access this menu, a list of the missed calls displays.

Received

This menu lets you view up to 30 of the most recent calls you have received if you subscribe to the Caller Line Identification service. Contact your service

provider for further details about this service. When you access this menu, a list of the received calls displays.

Dialed

If Caller Line Identification is available, your phone keeps a list of the 30 most recent dialed calls that you have made. Contact you service provider for the availability.

Call Duration

In this menu, You can see view Call Timers. There is the duration of all calls for your phone.

Settings

Many different features of your phone can be customized to suit your preferences.

To access this menu, press [**MENU**] in Idle mode and select **Settings**[]
