Application for Class II Permissive change for FCC ID: RIASJMRF

Dear Sir/Madam,

Please find transmitted electronically, an application for a Class II Permissive change for implants used in a previously granted medical implant communication system that operates in the MICS band from 402 to 405 MHz, under Part 95 of the FCC Rules and Regulations.

The application contains a separate request for permanent and short term confidentiality of specified documents.

The Class II Permissive change is to place the RF circuit on the main implant hybrid board instead of using a separate RF hybrid. Using only one hybrid reduces the size of the active implant.

If there are any questions, please feel free to contact me at: +1 818 493 2761

or via email: jwong03@sjm.com

Sincerely,

Jennifer Wong
