Overview

This application is for an original approval of a 915 MHz un-licensed transceiver operating under Cfr 47 15.247. The device is used to collect data from transceivers mounted on water pipes. The device can be body worn and is considered portable for RF Exposure requirements.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
