Ref: Application for Approval/Waiver for Class B AIS Unit
Grantee ref: RIK, FCC ID (assumed) RIKS287, FRN 0008512048
USCG Approval Number: 165.156/4/0
EU BABT Approval Number: NC/13095

Correspondence ref no: 33548

Dear sir/madam

This letter is to confirm that we request waiver to allow the approval of our SeaTraceR S.287 Class B AIS device under the existing AIS rules.

I believe you now have a complete set of documents supporting our application form 731, covering our application for FCC approval for our S.287 *SeaTraceR* Class B AIS Transponder for marine applications. Our product is built using the PCB assembly from Software Radio Technology of the UK, who have also sought your approval/waiver, and they have authorised access to their detailed documents in support of our application (see Attestation section).

Yours faithfully

C R Watts
