6<sup>th</sup> April 2004

**Ref: RIKS701/EA327923**

**Dear Mr Leimer**

I have today submitted some more internal photos of our SART PCB, and also circuit diagrams, as requested in your correspondence ref 26615 – my apologies for their omission.

In response to your comments on confidentiality, I submit the following:

The S.701 SART is indeed sealed for life – the electronics ‘payload’ is welded into its plastic case during manufacture, and is NOT accessible even during battery change. The case would have to be physically broken apart to gain access to the circuit board and antenna. We would therefore request that the internal photographs, operational descriptions, circuit diagrams and parts lists are marked as confidential to protect our Intellectual Property from inadvertent or intentional disclosure to third parties. As per your guidance, we agree with removing the ‘confidential’ marking from the other items.

Please let me know if there is anything else you require for your consideration.

Yours faithfully

C R Watts

Co. Registration No: 4482935
