Amanda, please also note that the FCC allows a maximum of 4MB per file, so please either reduce the resolution or split this 9MB file into smaller portions when you resend.

Thank you,

Chris Harvey

Amanda, The Users Manual replacement file has an error and I can not open the file. Please resend the Users Manual rev 8/10.

Thank you,

8/10/2006

Chris Harvey

主旨： ZINWELL CORPORATION, FCC ID: RIW-ZW-2000, Assessment NO.: AN06T6030, Notice#1

Dear Jessica Ho,

I have reviewed the above referenced TCB application and find that the following items are needed before the review can be completed:

1. Page 79 of the Users Manual mentions Professional Installers, but does not require professional installers. In order to comply with the requirements of 15.203 with the use of a standard connector (the enclosure appears to have an N-connector and the manual recommends Lightning Arrestors) Professional Installation is required and must be clearly documented in the installation guide. Please update the Installation Guide with clear Professional Installation wording.

Ans: The userman had been revised on p80 (warming statement). Professional Installation wording on page 6.

2. The MPE Exhibit in the test report, Remark #1 states that the RF power is 22.44dBm, but this is not consistent with the remainder of the application. Please correct this discrepancy.

Ans: The test report had been revised on page 69.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and

8/10/2006

forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
