

## American Telecommunications Certification Body Inc.

6731 Whittier Ave, McLean, VA 22101

March 4, 2004

RE: Electronics Line 3000 Ltd.

FCC ID: RIYEL2601-2

I have a few comments on the above referenced Application.

## **EMC Report**

- 1) Please provide a better top view of the board so as to show the components behind the battery.
- 2) The operational description provided is simply a TX attestation. Please provide an exhibit for the operational description.
- 3) Please provide information regarding the test mode TX cycle and how it is compliant to 15.231. It does not appear to meet the definitions of 15.231(a)(2). Please note that this is not considered a manual transmission, unless a button is continued to be pressed for the duration of the TX period.
- 4) Please provide information to show/support compliance to 15.231(a)(2), ie .- test data. Please note that historically the FCC always request test data to show the device shuts off properly, regardless of an attestation.
- 5) Please confirm that this TX does not utilize polling or supervision transmissions.
