EL2601 / 2602

EL2601: W/L magnetic sensor based on read switch that is activated by magnet in order to activate a transmitter. Includes tx that transmit data in a frequency of 418MHZ, modulated FSK. Each event caused transmission of 1 sec

EL2602: same as EL2601 same tx same data, but instead of read switch it has terminal block for wire output to connect to any passive or switch sensor that is used to activate the tx. Each event caused transmission of 1 sec.

For 15.231(a)(2) compliant refer to test plot
