RE: FCC ID: RJE160836-00_ATCB001116

Attention: Leon Kogan

I have a few comments on this Application.

1. Please note that internal photos of part 15 devices cannot be held confidential. You also show items that might be considered confidential as not being confidential (i.e. the QC test procedure, block diagram and operational description. Only the following items can be considered confidential for part 15 devices: schematics, theory of operation, block diagrams, parts lists (if provided), and the QC test procedure. Please remove the internal photos from the confidentiality request and provide the corrected confidentiality request stating which items are to be held confidential.
2. Please note that the FCC ID must be on the outside of the device. Please provide a sample of the FCC ID label and a photo or drawing of where on the outside of the device the label will be placed.
3. Please note that on page 21 of the report you show a failing reading at 88.1MHz. Please retest and provide a report with compliant data.
4. Please note that this device can be used in all three orthogonal planes. Please test this device in all three orthogonal planes as required by the FCC.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
