Safety Precautions (To be strictly followed)

WARNING!!!
PROHIBITED ITEMS!!!

Do not use this product in the   airplanes or in medical institutions. This product involving radio transmission.

Do not touch this product with wet hands or expose to water. This product is not waterproof. This kind of conditions play the mischief of this product.

Do not use this product under direct sunlight. It may cause malfunctioning to the product.

Do not use this product in extremely cold, hot or humid condition. It may cause malfunctioning to the product.

Do not use this product in a dusty place. It may cause malfunctioning to the product.Do not vibrate this product strongly. It may cause malfunctioning to the product.

Do not place this product close to the fire. It may cause malfunctioning and deform to the product.

Do not disassemble, modify or replace the component of this product.

Do not use batteries that are not specified. It may cause malfunctioning to the product.

Table of Contents

Package Contents

One terminal (including acrylic panel)
One mini USB cable
Two triple A batteries

One hexagonal wrench

Quick start guide
Manual booklet
Warranty

1. GETTING READY

■1-1.Inserting batteries.

This product uses batteries for its power. Insert batteries properly before using.

*Please be aware of the direction of batteries.

■1-2. Acrylic panel

Acrylic panel can be removed by using hexagonal wrench.

Enjoy with favorite picture or various pattern by attaching them to this product and protect them with acrylic panel.

*Please be aware that the acrylic panel can be broken if screws are tightened too strong.

2. OUTLINE

This product stores more than 90% of golf course data in Japan in its internal memory. It determines a position (calculates your current longitudeand latitude on the earth.) by using GPS satellite and displays calculated distance to the target position on the golf course that is recorded internally in this product.

Note) Please see support page on our website regarding to the registered golf courses of this product. Also the information on adding corresponded golf course and corrected golf course data are on our website.

3. FUNCTIONS

Automatic golf course search

This product determines which golf course you are located by searching golf course data registered in this product from current position.

Automatic Hole information display

This product displays information of the hole automatically when you go into tee ground. It may not display information of the hole automatically, since it depending on the condition of golf course. In this case, operate this product and select the hole by manually.

Distance display

Object for distance display: green edge, green center, and specific target.
The target (object) can be changed as pushing select button.

Registering mark and flying distance display

This product stores (registration position) specific mark (e.g. ball position) into internal memory with button operation. It can store 1000 positions. And it displays distance (flying distance) between registered position and current position if positioning registration is completed.

4. MAIN SPECIFICATIONS

■4-1. GPS specifications

positioning specifications

Received frequency	: 1575.42 MHz(L1 frequency band)
Received code	: C/A code (1.023MHz)
Number of received channels	: parallel 32 channels
Positioning system	: independent positioning, DGPS
Geographic coordinate system	: World Datum (WGS-84)

Positioning   performance

Positioning accuracy	: 5m (2D-RMS)
Acceleration accuracy	: 0.4m/sec.
Hot start	: 2 sec. (Typ.)
Warm start	: 35 sec (Typ.)
Cold star	: 42 sec (Typ)
Received sensitivity	: Acquisition -146dBm
	Tracking -158dBm
Output updating cycle	: 1 sec

Maximum performance

Altitude	: 18,000m
Velocity	: 515m/sec
Acceleration	: 4G

4-2. Bluetooth specifications

BT version	: Bluetooth V1.2
Output	: Class 2
Communication distance	: Max 10m

4-3.   USB specifications

Connector type	: mini-USB typeB

4-4.Terminal specifications

Dimension	: width46mm×height78mm×depth25mm
Weight	: 65g (batteries are not included)
Display	: Monochrome 128×32 dots

Power	: Two triple A type batteries
Airtime	: About 15 hours (with alkali battery)
	Airtime depends on what type of batteries is used.
Operating temperature	: 0-40°C

5. PART NAMES
Power switch	: Turns on/off the power.
Select button	: Changes selections.
Back button	: Returns to the previous title.
Ok button	: Determines selection item.
Screen	: Displays selection item and distance information
Antenna	: GPS antenna (internally embedded.)

6. PRECAUTIONS

This product specifies the position by receiving radio wave from GPS satellite.Therefore, it may have a large margin of distance error on the screen. Covering antenna or directing it to the person cause lowering the sensitivity and the product can not locate the accurate position. Try not to cover antenna with body when you use it.

Positioned location may vary slightly even though you are in the same position. GPS satellite always moves around the earth as a result the location of GPS satellite changes from your point of view. Also it is difficult to acquire the satellite under big trees or high buildings.

This product may have measurement error due to positioning accuracy of GPS(5m) and Course data accuracy (5m).

This product is not waterproof. Do not operate it with wet hand or water it, it may cuase mal functioning to the product.

Batteries that included with this product is for short term use. New batteries (alkaline battery) can last about 15 hours at normal condition.

Be aware of the remaining battery before using it. It may not be able to locate the position when battery is low.

This product has stored course data in internal memory. Longitude and latitude information of green center and green edge point on golf course is set. Therefore, information may be different from edge position that is set by a golf course. Also stored golf course data may be different from actual course data due to overhaul of golf course or naming change although these information has been carefully acquired and researched.

The positioning distance of this product only shows distance from point to point. It does not include undulation of golf courses such as vertical interval.

This product can be used for official game only if local rule of each committee has authorized it. Inquiry to each committee is recommended before the game.

Be careful with slow play when you use this product.

Because this product shows straight distance to green from any position, the distance from tee ground to green may be shorter than actual distance especially on dogleg.

We have planned on updating and adding more stored golf course data of this product. Also we offer user support regarding to this product on our website. Please visit our website and perform user registration.

"FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.
--Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help."

"RF exposure warning??
·This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance. "
