RE: FCC Registration Number

Dear Mr. Fabina:

Utilimaster Corporation and Strattec Security Corporation entered into an agreement dated May 9, 2003 that granted to Utilimaster Corporation all rights and title to and interest in certain assets including the right to manufacture, sell, use, design and arrange for the production of a vehicle access and control (VACS) system specifically for certain vehicles commonly known as step-vans or walk-in vans manufactured in whole or in part by Utilimaster for its customers. This transaction transfers to Utilimaster all design and production information that will allow for the continued manufacture of the products in the same configuration for the same intended use.

It is our intent to use the same electronics manufacture as that used by Strattec Security Corporation for the continued production of the components classified as DSC-Security/Remote Control Transmitters. Utilimaster will ensure that the components will be manufactured from the exact design drawings and printed circuit board layouts used by Strattec. The FCC ID numbers for the components are VACS599072 and VACS598832.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey J. Smith".

Jeffrey J. Smith
