

DriveBlue™

Installation-Free Wireless Car Kit For Bluetooth-Enabled Phones

DriveBlue is a universal car kit using Bluetooth wireless technology. It provides drivers with easy and instant operation of mobile phones. With broad support for all Bluetooth mobiles, users can change phone or car model and still benefit from the following features: one-touch handling of calls and voice recognition dialling. According to the phone's capabilities, additional features include dual call, caller ID, private mode, and menu on the phone's display.

DriveBlue integrates advanced Digital Signal Processing electronics and software specially adapted to noisy conditions. The driver's voice, picked up by the built-in microphone, is processed to remove background noise and echo. Both parties benefit from high-quality sound.

Size: 130 x 64 x 55mm

DriveBlue will turn on when inserted into the cigar-lighter socket, and the car's ignition is on. DriveBlue provides a set of standard features to all Bluetooth phones. Visit www.driveblue.com for an update on additional phone-specific features.

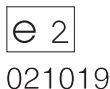

- To wirelessly pair the DriveBlue unit and phone for the first time, enter the **1234** password from your phone's Bluetooth menu. Wireless connections are then automatically established.
- **Answering a call:** Press the green button on the DriveBlue unit.
- **Hanging up:** Press the red button on the DriveBlue unit.
- **Making a call:** Press the green button on the DriveBlue unit and speak a name from your phone book, after first hearing the 'beep'. Voice dialling requires a set-up procedure specific to the phone.
- **Redialling:** Press and hold the green button on the DriveBlue unit for 2 seconds. (Supported by all phones with a Handsfree profile)
- **Dual call:** Press the green button on the DriveBlue unit upon hearing the 'beep' to place the active call on hold and accept the waiting call. Press the green button again to alternate between calls. Press the red button on the DriveBlue unit to reject the waiting call. (Supported by all phones with a Handsfree profile)
- **Setting the volume:** Volume is adjusted by the side control on the DriveBlue unit.

Updated user resources and services specific to your phone are available in a variety of formats and languages from our website.
