

Parrot CK3100 ADVANCED CAR KIT

Handsfree Car Kit with LCD display

Shows your telephone data

CK3100 ADVANCED Car Kit is the first *Bluetooth*® Kit from the Parrot's new product range.

With an LCD display, board and set-up key, CK3100 shows:

- your phone book
- the incoming caller's name
- your last calls list

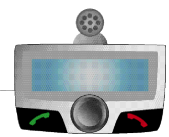

CK3100 offers high installation flexibility and is compatible with all existing *Bluetooth*® phones.

***Bluetooth*® wireless technology in brief**

Bluetooth is a short range radio technology that can transmit voice and data at speeds of up to 1/Mb/s. Launched in 1998 by the special interest Group (SIG) comprising, among others, Ericsson Intel, IBMc, Toshiba and Nokia, Bluetooth technology is currently promoted by nearly 2000 companies and relies on frequencies available worldwide.
