

### A useful travelling friend

With its sober and elegant design, its high definition OLED screen, the Bluetooth hands-free car kit Parrot MK6100 enables you to establish in a few seconds any phone conversations in your vehicle without needing to handle the telephone, even leaving it in your pocket. Once paired, connection with your mobile is made in a completely transparent way. An incoming call? Press the green button to take the call while the kit mutes the sound of the car radio automatically during the conversation.

### Advanced features

The Parrot MK6100 automatically synchronizes the names and phone numbers in your mobile with its phone book. When you receive a call, the name and the number are displayed on the screen. To follow on your conversation in a discrete mode, switch instantaneously the communication towards your Bluetooth headset or your telephone. Another unique feature: the screen of the Parrot MK6100 is detachable from its support when you leave your vehicle, for ultimate security.

### Always accessible

Positioned on the steering wheel or placed wherever is convenient, the RF remote control of Parrot MK6100 gives you the total control you need right at your fingertips! Simple and intuitive, its interface lets you browse within your address book or start playing the music of your choice.

### High quality sound

Digital Signal Processing is a speciality of Parrot. The Parrot MK6100 integrates new and particularly effective software of noise reduction, Parrot Beamforming Technology. Unexpected noises in the car environment are numerous and can become awkward for you and your callers. Parrot Beamforming Technology and the two built-in microphones act as two human ears: they eliminate all the noises other than the voice range.

### Play your music on the kit

The Parrot MK6100 is a music playing hands-free car kit: play your favourite MP3 files on the car's speakers from any Bluetooth Stereo (A2DP) source: mobile phone, MP3 player... Once paired, the music player connects automatically to the MK6100. Press PLAY on the kit's remote control to start reading the MP3s and benefit from the digital amplifier which transforms your car into a true concert hall!

### Keep your eyes on the road

Access the list of your contacts in the kit's phone book and let the MK6100 read them for you thanks to the function Text to Speech. Press one button to validate your choice, the kit initiates the call. And for often called phone numbers, directly pronounce the name of your correspondent and the built-in voice recognition composes the number for you. Simply essential!

## Bluetooth Wireless Technology

The Bluetooth wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The Bluetooth Stereo (A2DP) profile uses the same short distance radio frequencies to transport musical files from one peripheral to another one.

## Phone compatibility

As Parrot products are 100% Bluetooth compatible, they are compatible with almost every Bluetooth mobile phone. Refer to [www.parrot.com](http://www.parrot.com)

Example: Alcatel, Asus, Audiovox, BenQ, Blackberry, Eten, Grundig, HP, HTC, I-Mate, LG, Motorola, NEC, Nokia, Palm/Treo, Panasonic, Philips, QTek, Sagem, Samsung, Sendo, Sharp, Siemens, Sony, Ericson, SPV, Telital, VK mobile...

## Technical and commercial specifications

### Parrot MK6100

Bluetooth Hands-Free Car Kit

### Specifications

#### Screen

OLED 128x32 pixels, hi contrast display  
Optimal visibility in every position  
Displays phone information  
Displays names and phone numbers of callers  
Detachable screen
