RHYTHM N'BLUE

Drive, Talk, Be!

Parrot CD/MP3/Bluetooth Receiver with integrated hands-free phone mode

With the Parrot RHYTHM N'BLUE, drivers can listen to CDs, a radio station or even their own MP3 recording plus make and receive phone calls. And thanks to its superb design and backlit buttons, the use of these features quickly becomes second nature. Seven backlight colors are available. The keypad controls phone dialing and messaging functions, and provides preset radio station selection.

Access your phonebook directly from your car stereo

Synchronizing your mobile phone phonebook with the car stereo memory allows for easy access to your contacts. When an incoming call is received, the caller's name is displayed. Numbers may be dialed manually or hands-free using the voice recognition feature; the driver says a name and the number is automatically dialed.

Crystal-clear sound with the AM/FM RDS and CD/CD-R/CD-RW/MP3 player

The screen displays the ID3 tags of the tracks in your MP3 compilations. Customize your sound environment with DSP (Classic, Rock, Pop and Flat). Use the bass and treble equalizer and the bass amplifier to control wattage and take full advantage of the exceptional sound quality.

Installation is a breeze

The Parrot RHYTHM N'BLUE is quick and easy to install thanks to its standard ISO connectors. The unit fits seamlessly into the instrument panel.

Take advantage of a universal Bluetooth® solution

The Parrot RHYTHM N'BLUE is compatible with Bluetooth® phones.
