Parrot

PARROT DS1120

The *Bluetooth* Hi-Fi Stereo Sound-system

You store your music on your computer, mobile phone, MP3 player, everywhere… The Parrot DS1120 is the new wireless hi-fi stereo concept with an eye-catching design, letting you unleash all your songs, regardless of the source. Wired or wireless, take advantage of your favourite music wherever and whenever you want.

Touch-sensitive for even greater style

With its attractive shape, modern design and flawless finish, the Parrot DS1120 has been designed to perfectly fit any modern interior. Its touch-sensitive keys and bass system hidden in the stands make it incredibly attractive.

Wireless

Say goodbye to those unsightly wires that just will not connect! The time has come for wireless. Enjoy your favourite tracks from any *Bluetooth* stereo (A2DP) source, such as your *Bluetooth* mobile phone, computer or MP3 player fitted with a *Bluetooth* adapter.

Sound quality

The Parrot DS1120 is crammed full of technology, combining power with faithful sound production. Each speaker features a built-in Class D digital amplifier and reproduces crystal-clear sound with a power output of 30 W RMS. Power and quality combined within a single product.

Bluetooth guaranteed

Connect the Parrot *Bluetooth* adapter supplied with the Parrot DS1120 to your PC and take advantage of the freedom of wireless. Listen to your music over your speakers via *Bluetooth* both easily and instantly. So enjoyable!

Every source

Send and listen to your playlist from any *Bluetooth* (A2DP) source, such as a mobile phone or PC. The Parrot DS1120 also accepts all analogue audio devices connected to the line-in socket, like MP3 players, CD players and tuners. Enhance your music experience with an easy-to-use cutting-edge hi-fi stereo system, dedicated to the technologies of today's and tomorrow's worlds.

The wireless solution for your media centre

Bluetooth wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short-distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* stereo (A2DP) profile uses the same radio frequencies and can be used to send music tracks from one device to another.

Phone and device compatibility

Parrot products are 100% *Bluetooth* compatible and are therefore compatible with almost every *Bluetooth* stereo (A2DP) mobile phone. Visit www.parrot.com to find out whether your phone is compatible.
