Parrot

PARROT DS3120

Wireless digital MP3 radio

The Parrot DS3120 is a wireless digital MP3 radio system capable of playing all your favourite tracks from a wide range of sources (*Bluetooth*®, FM radio, USB, SD, line-in socket) and serves as a hands-free kit for all your calls by connecting to your phone by *Bluetooth*. Featuring a 1.8" colour TFT screen, the user-friendly, attractive interface allows you to set the alarm and view the song currently being played. Enjoy your music with all the power and precision of the 20W sound.

1.8" colour screen

Do you prefer a gentle wake-up call or a real kick-start to the morning? According to your mood, set the time and choose the song that you want the Parrot DS3120 to play when waking you up. Its intuitive interface and 1.8" colour screen will enable you to easily master the wide range of features on this wireless digital MP3 radio.

Multi-compatibility

In addition to its *Bluetooth* wireless connection and FM tuner, the Parrot DS3120 also incorporates an SD slot and a USB port hidden beneath a flap for a flawless speaker design. For complete freedom, the hands-free function lets you connect the Parrot DS3120 to your phone via *Bluetooth*. Your phonebook is automatically synchronised. You can make and receive calls without your phone.
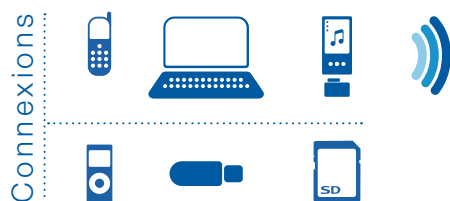

The quality of 20W sound

The Parrot DS3120 is a very high-quality multimedia station developed by Parrot's acousticians, combining power and precision. Its digital Class D amplifier and its two drivers produce 20W RMS crystal-clear sound.

Wireless music

The battery-operated Parrot DS3120 can be used anywhere. As a result, you can take it from one room to another! Listen to the radio in your kitchen, the music on your USB flash drive in your bedroom and then stream your music in the garden using *Bluetooth*. Set your music free!

Wireless music and hands free calling in one box

Connexions

Bluetooth wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short-distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* stereo (A2DP) profile uses the same radio frequencies and can be used to send music tracks from one device to another.

Phone and device compatibility

Parrot products are 100% *Bluetooth* compatible and are therefore compatible with almost every *Bluetooth* stereo (A2DP) mobile phone. Visit www.parrot.com to find out whether your phone is compatible.
