## Parrot PARTY

### Portable wireless soundbox

Light and compact – only 21 ounces – the Parrot PARTY is the mobile soundbox that you can take with you everywhere. Equipped with a built-in rechargeable battery, it gives you more than 4 hours of uninterrupted music wherever you use it – at home, or out partying with friends.

### Stereo sound 2x6W

The Parrot PARTY provides an incredible sound quality for such a compact device thanks to its Class-D amplifier and two wide-band speakers whose response curve was reconfigured especially for the Parrot Party. Its sound is dynamic, clear and detailed. Two astonishing audio effects created by Parrot will convince you: the first effect - Stereo Widening that broadens the music to fill a room; and the second effect – Virtual SuperBass – reinforces the bass frequencies and gives them punch.

### Trail speakers

The technology of the Parrot PARTY and its optimized acoustics is adapted to all styles of music. From rock'n'roll to R & B or pop songs, it offers a perfect feeling of realism. Relax at home with the sound of your favorite lounge music or escape on crazy rhythms.

### Designed for your hands, your eyes... and your ears

Tempting curves, a tested robustness and a neat design. The Parrot PARTY is portable, modern and compact, only 9 inches long. This stereo is dedicated to the enjoyment of your eyes and ears.

### Cell Phone, PC, MP3 or CD player... this is your choice

Without having to install special software you can send your playlist to the Party wirelessly from any *Bluetooth* Stereo (A2DP) source: *Bluetooth* A2DP mobile phone, *Bluetooth*-enabled PC computers, or *Bluetooth* MP3 players. The Parrot PARTY also has a line-in input so it can play music from any analogue music device such as a CD player, standard MP3 player, or MD recorder. The Parrot PARTY automatically detects the music source whether its *Bluetooth* or Line-In. Enrich your musical experience with this avant garde stereo. It's simple to use and designed for current and future technologies.

# What about carrying your favourite band in your pocket ?

## Wireless technology

*Bluetooth* wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* Stereo (A2DP) profile uses the same short distance radio frequencies to transport music files from one peripheral to another.

## Phone & device compatibility

As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* mobile phone. Refer to [www.parrot.com](http://www.parrot.com)  
Example: Asus, Audiovox, BenQ, BlackBerry, Eten, Grundig, HP, HTC, I-Mate, LG, Motorola, NEC, Nokia, Palm Treo, Panasonic, Qtek, Sagem, Samsung, Sendo, Sharp, Siemens, Sony Ericsson, SPV, Telital, VK mobile and many others.

## Technical and commercial specifications

### Parrot PARTY

Portable *Bluetooth* stereo

### Specifications

Stereo 2.0 audio system

Two wide-bands speakers

Class-D amplifier

User interface: 5 buttons + On/Off button

3 LEDs: *Bluetooth* status and audio effects

Settings: volume, mute, reset

Mode: Normal, Pairing, Low Power, Low Battery

Compatible audio sources\*:

- *Bluetooth* Stereo (A2DP) devices

- Analogue audio devices
