

A collection of electronic components is laid out on a light blue surface. The central component is a black rectangular CANBUS module with a label that reads "CANBUS" and "ELECTRONIC". To its left are several cables: a multi-colored CAN bus cable with a black connector, a black USB cable, and a black power cable with a red and black wire. To the right of the module is a small black box with a label, a coiled black cable with a white connector, and a small black antenna with a gold-colored tip.
