Output power listed is peak conducted. Modular Approval for use as a module in only mobile or fixed exposure conditions and restricted to OEM Installations. Antenna gain including cable loss must not exceed as documented in filing, for purposes of 2.1043 and 2.1091. The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons, and must not be co-located or operating in conjunction with other antennas or transmitters except in accordance with FCC multi-transmitter product procedures. Compliance of this device in all final product configurations is the responsibility of the Grantee. Installation of this device into portable RF Exposure category devices requires the submission of a Class II permissive change application where appropriate containing data demonstrating compliance for SAR, spurious emissions, ERP/EIRP, and host / module authentication, or new application if appropriate. Users and installers must be

provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance. This device contains modes not operational in U.S. Territories.
