Re: Attestation Statement

Gentlemen:

This letter is to justify Fishman not placing FCC ID on the module itself and including it on the host device. The Bluetooth Module ALM-A01-CSR8645 FCC ID # RMU-PROLBX500 is very small and the label is even smaller (14mm x 7mm). Therefore, it is not practicable to put the FCC ID and IC certification number on it. The label won't be accessible when using the product because the module will be placed inside of the host product.

Sincerely,

A handwritten signature in black ink, appearing to read "JC", with a long horizontal flourish extending to the right.
