Re: OEM100 Label information

Gentlemen:

The label material is 2.3 mil white polyester with a 1.1 mil acrylic permanent self adhesive. The adhesive is UL approved for use with many substrates including acrylic which is the base material of the solder mask coating of our printed circuit board (PCB). The manufacturer guarantees that the label will remain adhered for the lifetime of our product.

The following page is a sample rendering of our rear label. The label will be affixed to the bottom of the PCB.

Sincerely,

John O'Brien
Senior Principal Hardware Engineer
