

#CS 01136 FCC ID#: RNW-AQL-BASE-RF

Goldline Controls Incorporated

We have identified this issue following our review of the application:

1. Please justify the reasoning for not having the 15.19(a)(3) statement on the label.

**Photo Three – External
Base Transceiver with Close Up of FCC ID Label**

Response:

Based on the size of the product and the imbedded plastic area for the label, the label size restriction will not provide enough room for the following statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Please see the mechanical dimensions file submitted. The mechanical drawn of the Base case work is in inches.

The bar code lines provide manufacturing and shipping control.

The base unit is also typically mounted against a flat surface which restricts casual viewing of this statement.

This statement is printed in the operator's manual for viewing.

It is viewed that this statement would not have an impact on the performance or operation of this product.
