RE: FCCID: ROJ-AVIATOR700

The AVIATOR700 System includes the following main units:

TT-5040A or TT-5040A-THD Satellite BGAN Unit
TT-5035A or TT-5035A-THD Satellite Data Unit
TT-5014A or TT5014A-THD High Power Amplifier
TT-5013A Duplexer Low Noise Amplifier

TT-5040A contains an already FCC approved WLAN module with Certification No:

FCCID: TK4-WLM54AG

WLAN country codes

D.1 Restrictions in WLAN use

Not all countries allow full use of all channels. Also, some countries do not allow operation according to the 802.11g standard. Therefore the WLAN interface must be set up to the right country code.

By default, the SBU is set up to the US country code that allows the WLAN interface to operate according to the 802.11b and 802.11g standards on the channels 1 to 11. If the equipment is used in the countries listed in Table D-1 on page D-2, the default country code "US" can be used. In other countries the country code "other countries" must be used, allowing the interface to operate only according to the 802.11b standard on channels 4-9.

To set up the country code, use the WLAN page of the built-in web interface in the SBU. For further information see *WLAN interface (option)* on page 6-22.
